PROFESSIONAL EXPERIENCE

Flutter Developer(Intern) 08/2024 – present
Luminar Technolab Kochi, India

EDUCATION

B.Tech in Computer Science 08/2020 – 06/2024
APJ Abdul Kalam University of Technology

Higher Secondary Education 08/2018 – 06/2020
Kerala State Board of Higher Secondary Education

Secondary Education 06/2018
Central Board of Secondary Education(CBSE)

PROJECTS

Blood Donor App

Developed an admin controlled blood donors list management app using Flutter, integrating an intuitive registration process for donors to input details such as name, phone number, gender, blood type, and last donation date. Implemented SQLite to store donor data locally and display it dynamically on the home page as a list of donors, complete with blood type, Rh factor, and contact options. Enhanced usability with custom UI components, form validation, and seamless navigation.

Clone App (Instagram)

Developed a clone application of Instagram in Flutter featuring dynamic post feeds, seamless navigation, and interactive UI components. The clone-app allows users to explore posts, view details, and interact with content such as likes and comments. It incorporates efficient data handling to display user-specific feeds and supports navigation between screens while maintaining state.

Real-time Deep Fake Detection using Deep Learning

Real-Time Deepfake Detection using Deep Learning Developed and implemented a deep learning-based system for realtime detection of deepfake videos. Utilized convolutional neural networks (CNNs) to analyze facial features and patterns indicative of synthetic manipulation. The project involved extensive data preprocessing, model optimization, and deployment for efficient, low-latency performance

Online Bus Pass Generator

Developed a website that is dedicated to ease the process of booking a college bus pass using Django Framework and SQLite.

CERTIFICATES

**Complete Flutter Development
Bootcamp with Dart**
Udemy

Figma Bootcamp
Let's Upgrade

**Cyber Security and Ethical
Hacking Internship**
